770 Del Paso Road, Sacramento, CA 95834-0308

Assembly Instructions

Step 1

Insert the Gasket Seal into the Hose Connector.

Step 2

Insert one end of the Flexible Tube into a Plastic Nut so inside female threading ends up facing toward the end of the Flexible Tube.

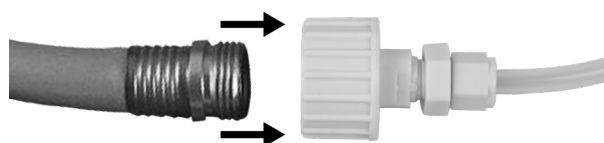

Step 3

Screw the nut with tube attached to the assembled Hose Connector.

Step 4

The Hose Connector will screw onto a standard garden hose.

Slides with **ONE** spray port location skip to Step 6
Slides with **TWO** spray port locations continue to Step 5

Step 5 - FOR TWO PORT SLIDES

Assembling the Center Spray Connector requires cutting the Flexible Tube into two pieces. The length of each piece will correspond to the following distances:

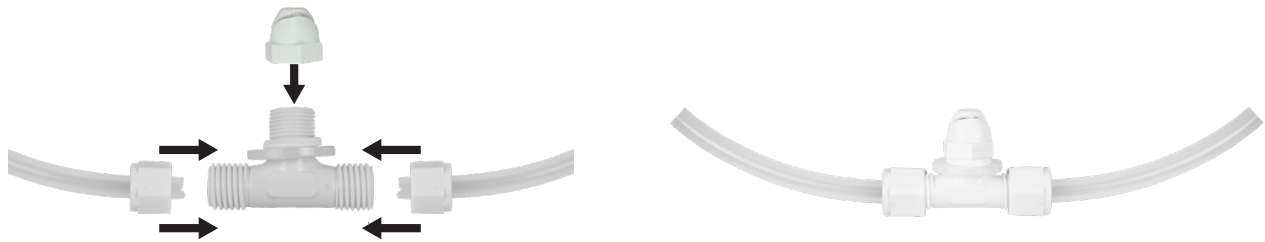

1- The distance from the **RIGHT SIDE** of the Center Spray Connector to the Hose Connection (already assembled).

2- The distance from the **LEFT SIDE** of the Center Spray Connector to the Main Spray Connector at the top of slide.

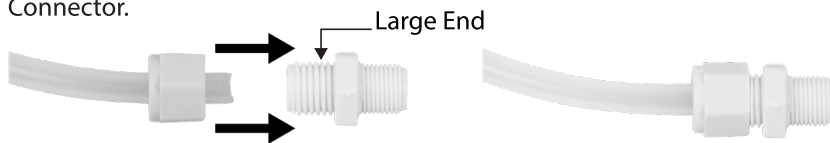

Place a Plastic Nut over the cut end of the 1st piece of Flexible Tubing making sure that the non threaded end is facing toward the Flexible Tubing. Attach to the **RIGHT SIDE** of the Center Spray Connector. Place a Plastic Nut over the cut end of the 2nd piece of Flexible Tubing making sure that the non threaded end is facing toward the Flexible Tubing. Attach to the **LEFT SIDE** of the Center Spray Connector. Attach the Wide Spray Nozzle to the top male threading of the Center Spray Connector. Attach the assembled Center Spray Connector to the center spray port of your slide according to your slide's manufacturer's instructions.

Step 6 -FOR ONE PORT & TWO PORT SLIDES

With the other end of the Flexible Tubing, place Plastic Nut over the cut end making sure that the female threading ends up facing toward the cut end of the Flexible Tubing and attach to **LARGE** threaded end of the Main Spray Connector.

If you have a **ONE** port slide choose from the Narrow Spray Nozzle or the Wide Spray Nozzle and attach to the **SMALL** end of the Main Spray Connector. If you have a **TWO** port slide attach the Narrow Spray Nozzle to the **SMALL** end of the Main Spray Connector.

Connect the assembled Main Spray Connector to the main spray port at the top of the slide according to your slide's manufacturer's instructions.
