

# Pool & Spa Jet Vacuum

28008

**POOLMASTER®**

We Make Water Fun!

770 Del Paso Road, Sacramento, CA 95834-0308

**CONTENTS:** Vacuum | Vacuum Hose Adapter | Garden Hose Connector | Vacuum Bag | Spring Clip

## Pole Insertion

### USING A STANDARD 1 1/4" POOL POLE (FIGURE 1)

1. Make sure the included spring clip is inserted into the pole port making sure the ends are seen through the pole port
2. Slide the pole over the pole port and make sure the ends of the spring clip are aligned with the holes on the pole – spring clip ends should be seen on the outside of the pole

Fig. 1

## Instructions

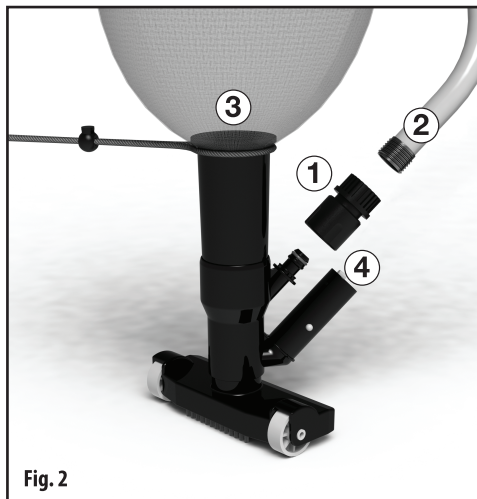

Fig. 2

### ASSEMBLY FOR JET OPERATION (FIGURE 2)

1. Attach garden hose connector to Jet Vac
2. Attach garden hose to the hose connector – hose not included
3. Attach vacuum bag to the top of the vacuum body just under the rim. Press and slide cord lock into place to tighten
4. Slide any standard 1 1/4" pool pole over the pole port and make sure the ends of the spring clip are aligned with the holes on the pole – spring clip ends should be seen on the outside of the pole (Fig. 1)
5. Turn on water to garden hose to initiate suction

### CARE/STORAGE:

When not in use, your Jet Vacuum should be rinsed with tap water and stored where it is protected from the sunlight. The brushes should be stored with the bristles up to keep them straight.

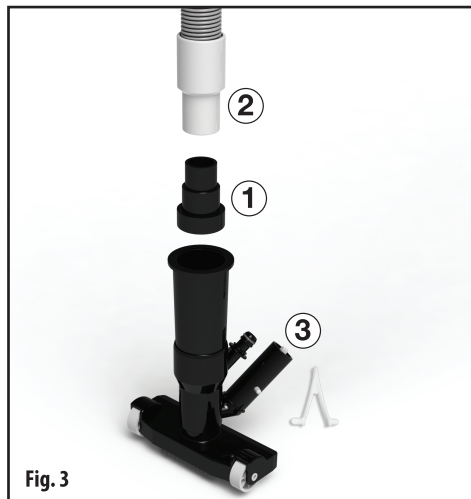

Fig. 3

### ASSEMBLY FOR THRU-FILTER OPERATION (IF USING WITH A VACUUM HOSE) (FIGURE 3)

1. Attach vacuum hose adapter to the top of the vacuum body – will accommodate a 1 1/4" to 1 1/2" hose – sold separately
2. Attach your vacuum hose over the adapter and push firmly into place
3. Slide any standard 1 1/4" pool pole over the pole port and make sure the ends of the spring clip are aligned with the holes on the pole – spring clip ends should be seen on the outside of the pole (Fig. 1)
4. Prime the hose by placing the vacuum and hose into the pool allowing the hose to completely fill with water

**PRIMING TIP:** You can use a garden hose to fill the vacuum hose or place the free end of the vacuum hose into the return line of the pool which will push water into the hose

5. Connect the water-filled hose to your skimmer or suction part of the pool (Fig. 4)
